

Rescue cards Volkswagen

Model overview

Note

The rescue cards always depict the maximum possible equipment of a vehicle according to the equipment variants provided by Volkswagen for a model.

Legal notice:

These rescue cards were created exclusively for emergency personnel who are specially trained in technical assistance after road accidents and can therefore carry out the activities described in these cards. Furthermore, the rescue cards contain information about vehicles intended for sale in the European Union. The rescue cards do not contain any information about vehicles intended for sale outside the European Union.

The range of vehicles offered by Volkswagen AG, as well as their specifications and special equipment, are always subject to change. Volkswagen therefore explicitly reserves the right to modify or change the content of the rescue cards at any time.

Please note:

The information contained in the rescue cards is not intended for end customers, and is also not for workshops and dealerships. Endcustomers can find information on the functions of their Volkswagen AG vehicle, as well as important vehicle and passenger safety information, in the vehicle wallet. Workshops and dealerships receive service and repair information from their usual sources.
